Project summary statement:

The southernmost segment of the Mukilteo Beach Interceptor is cast iron pipe constructed in the 1960s. It has deteriorated and is in a difficult location to repair and replace, therefore new sewer infrastructure is needed to redirect sewer flows. This project will collect flow from 413 single family homes and an upstream industrial area at a new sewer lift station, Lift Station #15 near Edgewater Park, and pump through a forcemain along Shore Avenue into a segment of the Interceptor in better condition to the northeast. Design of this project is coordinated with future projected needs identified in the 2024 Sewer Comprehensive Plan Update.
